

CTA Accessible Services and Features

The Americans with Disabilities Act (ADA) was enacted on July 26, 1990. Among its many provisions, this civil rights act is intended to ensure equal access to public transportation for people with disabilities. The CTA is in compliance with these regulations and continues to seek out ways to incorporate new or upgrade existing accessibility features as part of ongoing capital improvement work.

The following is an overview of the accessible services and features currently available to people with disabilities traveling the CTA bus and rail system.

Bus Features

Since 2005, our entire bus fleet has been accessible to people with disabilities. Although bus models in our fleet may vary, all are equipped with the following accessible features:

Ramps at the forward doors

Designated priority seating and wheelchair securement areas

Automated voice announcements and accompanying text displayed on LED signs

Rail Car Features

All CTA rail cars are accessible to people with disabilities. Roughly 50% of our current fleet consists of new 5000-series rail cars, which offer several new features to help meet the needs of riders with disabilities. Our oldest rail cars eventually will be replaced by the 7000-series, which are expected to begin arriving as early as 2020. These next generation rail cars will be designed to meet the latest ADA regulations.

The following are some of the accessibility features currently available across our rail fleet:

Accessible doors

Priority seats and designated wheelchair securement areas, as well as emergency call buttons available within this area

Exterior and interior automated voice announcements for stops and routes

Braille signage

Two interior LED signs displaying automated announcement text (5000-series only)

Rail Station Features

Currently, 99 of our 145 rail stations are accessible, with four more stations either being constructed or reconstructed and made wheelchair accessible by 2018.

In general, during rail service hours, individual support from CTA personnel is available at every rail station. Customer assistance buttons are located in the stationhouse and along the platform and can be used to request assistance. Other accessibility features at rail stations include:

Audio and Braille equipped fare vending machines

Wheelchair accessible fare gates

Braille station and platform signage

Elevators and/or ramps

Tactile platform edging

Gap filler boards to bridge the space between the platform and the rail car

Travel Tools

To help make taking public transit even more convenient, CTA travel tools allow customers to make informed decisions before and during their trip:

Receive alerts about the status of elevators systemwide or at your preferred station(s) through free subscription text/email service

More than 350 bus shelters equipped with CTA Bus Tracker digital displays and audio buttons throughout the service region

Estimated train arrival times accessible online, via text or through the Ventra app

To learn more about our service tools or to sign up for alerts, visit transitchicago.com/accessibility.

For details about all CTA service, call 1-888-YOUR CTA (1-888-968-7282) or 1-888-CTA-TTY1 (1-888-882-8891) (TTY).

Reduced and Ride Free Program Fare Cards

For qualified riders with disabilities, the Regional Transportation Authority (RTA) offers a Reduced Fare Permit, which offers CTA fares and transfers at a discounted rate. To learn more or apply, call RTA at 312-913-3110 (voice) or 312-836-4949 (TTY).

Rides are free on CTA buses and trains for any Illinois resident with a disability and enrolled in the Benefit Access Program. Information about this program is available by calling the Department on Aging at 1-800-252-8966 (voice) or 1-888-206-1327 (TTY) or by visiting www.illinois.gov/aging.
